

Building networks.  
Connecting people.

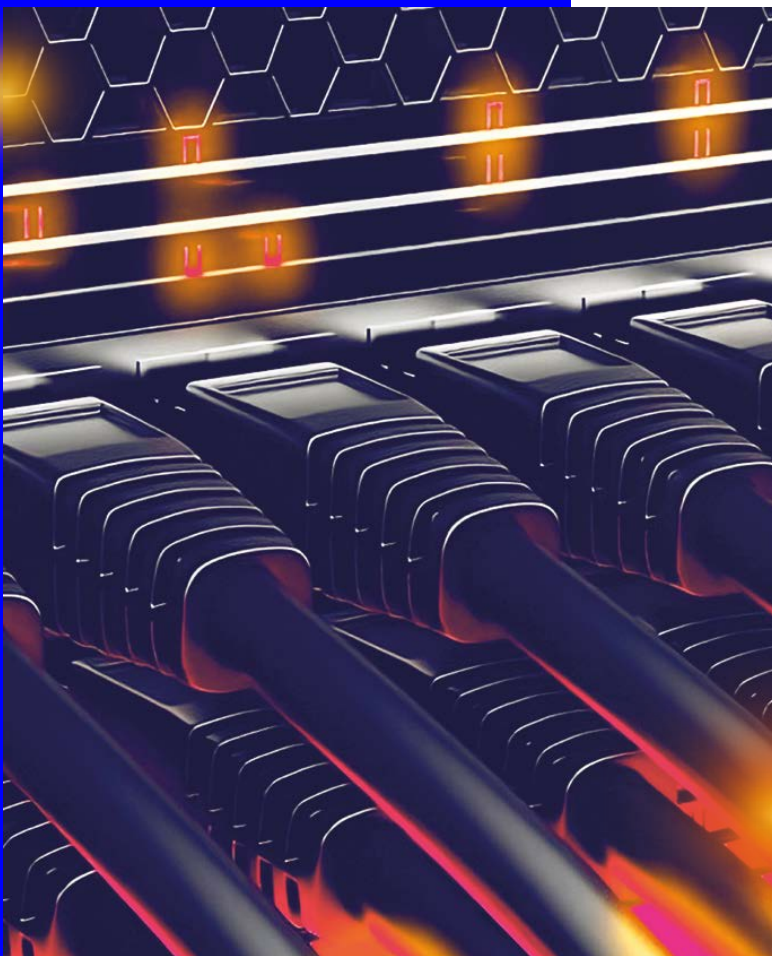

An aerial night view of a city skyline, likely New York City, with numerous skyscrapers and buildings illuminated by warm orange and yellow lights. The streets are also lit up, creating a vibrant, glowing effect. The overall atmosphere is one of a bustling, modern urban environment.

# Tomorrow is yours. NetCloud.

Our offer includes the installation of structured cabling, installation of fiber optics, creation of large-range Wi-Fi networks and monitoring systems.

WE WORKING LAST 27 YEARS

Construction and modernisation

# NetCloud builds networks and more.

NetCloud is a company specializing in the construction of telecommunications networks that help connect your home or business to the modern world of technology. We deal with comprehensive design and installation of Internet, telephone and television networks.

Our offer includes the installation of structured cabling, installation of fiber optics, creation of large-range Wi-Fi networks and monitoring systems. With us, you will gain fast and reliable internet, stable telephone connections and a crystal clear TV signal.

Let's summarize

# Network building and much more...

The main core...

We design and install Internet, phone, and TV networks, including structured cabling, fiber optics, Wi-Fi, and monitoring.

As part of our services, we deal with the creation and implementation of modern Internet networks that guarantee fast and stable access to the network in both homes and commercial spaces. We offer solutions tailored to the specifics of a given location, taking into account technical conditions, connection bandwidth and user needs. We use the latest technologies, such as fiber optics or Wi-Fi mesh networks, to ensure maximum efficiency and reliability of the connection.

CLOUD

Why choose us?

# Benefits for your business. Faster, safer, smarter.

Technology leader in the region

## Connected Future

Reliable telecom networks built.

## Smart Links

Efficient and secure connections.

## Signal Strong

Fast, stable, and scalable networks.

WE DO IT

- A. Landline and VoIP telephony
- B. Digital television and multimedia systems
- C. Structured cabling and fiber optic networks
- D. Wi-Fi systems and wireless network solutions
- E. Monitoring and security systems
